ABOUT MABDESIGN

MabDesign, the French association of the Biotherapy Industry

MabDesign, the French biotherapy industrial association, aims to support, federate and increase the visibility of the biopharmaceutical industry, foster exchanges, promote the development and competitiveness of companies, and stimulate innovation by encouraging the emergence of start-ups from academic research.

In order to carry out its development strategy and to adapt to changes in the industrial ecosystem, MabDesign's governance has evolved to meet the specific needs of the various companies working in the biotherapy industrial sector. Therefore, the Board of Directors of MabDesign already composed of DBV Technologies, Lyonbiopole, Pierre Fabre and Sanofi, has been considerably strengthened with the arrival of ABL Europe, bioMérieux, Institut Pasteur, Thermo Fisher Scientific and TreeFrog Therapeutics as well as three Qualified Persons with Nicola Beltraminelli (Lysogene), Hervé Broly (Merck) and Stéphane Legastelois (33 California). Their arrival to the Board of Directors reinforces MabDesign global vision of the current challenges and opportunities of the biopharmaceutical industry.

Moreover, to achieve its goals MabDesign sets up a coherent set of actions promoting exchanges, collaborations and skills development. In this dynamic MabDesign has developed a **national directory** that brings together industrial and academic players in biotherapy and allows to identify online the know-how available in France. MabDesign organizes high-level **international scientific events**, in collaboration with key ecosystem players, to highlight innovation and stimulate exchanges between companies in the sector. With the help of its Scientific Committee (**COSSF**), MabDesign writes summary reports (**ImmunoWatch**) for the biotherapy industry. Finally, MabDesign offers specialized and **innovative continuous professional training** solutions to enable companies to adapt their skills to the market evolution and maintain their competitiveness.

Operational since September 2015, MabDesign currently has over **210 member companies** and its diversity is its strength. MabDesign's dynamic network includes pharmaceutical and biotech companies, service providers (eg. CROs, CDMOs, etc), professional training actors, high-tech equipment suppliers and specialized consultants.

The objective of this two-day congress is to foster interactions between pharmaceutical industries, research laboratories, service providers, technology developers and clinicians, thus contributing to the development of innovative strategies against infectious diseases in a multidisciplinary approach. I4ID2021 follows the success of the first four editions, which counted with the presence of more than 750 participants from different countries representing more than 300 organizations and 130 internationally renowned speakers who exchanged on immunotherapy as a new therapeutic approach to fight infectious diseases.

Themes

- Prediction of future infectious outbreaks •
- New tools for monitoring diagnosis & prognostics •
 - Leveraging clinical trial data •
- Anti-infectious approaches : new trends and challenges •
 - Next-generation of vaccine design •

Already 10 years of scientific exchanges on therapeutic antibodies! This anniversary edition will cover not only the fields of therapeutic antibodies and derived formats, but also cell and gene therapies including CAR-T chimeric T cells and derivatives.

This edition, which will bring together academic and industrial experts, will take place over 2 days in Montpellier and will combine several high-level plenary conferences, an exhibition hall, a pitch session for innovative projects/technologies as well as a poster session for start-up projects, in addition to a B2B meeting platform to maximize the creation of partnerships.
